

Ti-Bone Smooth Face Replacement with Bolt Kit

Replace your worn smooth hammer-head or swap out a smooth for a milled face on your STILETTO® 15-ounce hammer with the TiBone TBII-15 Smooth Replacement Face with Bolt Kit. The face is all steel, and bolts into a Stiletto all-titanium head. The Stiletto TiBone smooth replacement face fits Stiletto's 15-ounce, 18-inch, straight- or curved-handle TBII-15 that delivers a striking force equivalent to a 28-ounce steel hammer. The replacement face for the titanium hammer is nonmarring so that it won't leave framing imprints. You attach the Stiletto steel replacement face to the head with a 3/8-24 threaded black alloy bolt and accompanying 7/32 x 6-inch Allen wrench. The face seats securely into the head with Loctite adhesive. The Stiletto replacement face with bolt aligns with the head slot that holds starter nails against the magnetic sub face.

INCLUDES:

(1) 4oz Smooth Face Replacement Kit (TBS-R)

FEATURES:

- Steel face fits Stiletto's 15-ounce, 18-inch titanium hammer with a curved or straight handle
- Stiletto steel replacement face has a nonmarring surface
- Face fits securely on the titanium head with a bolt, washer and Loctite adhesive
- Starter-nail slot on the face aligns directly with the slot on the magnetic sub face
- Stiletto replacement face with bolt kit comes with a 1-year limited warranty
